### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION*****Drawings***

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "22" has been used to designate both the seat and the static seal portion in Figure 2. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Iverson (4,685,685) in view of Chandler (6,213,476).

Iverson discloses a seal comprising a u-shaped body with a dynamic seal 28 on an inner wall 20, a static seal on an outer wall 18, a seat 22, a channel 30 defined by surfaces 40 and 38 of the walls and a top 42/44 of the seat, and a plurality of ribs 46/48 attached tangentially to he

surfaces and diagonally (seen best in Figs. 2 and 4) to the top surface of the seat. Iverson does not disclose that the dynamic seal is a composite. Chandler teaches a seal with a dynamic seal portion 26. Chandler teaches making the dynamic portion a composite (i.e. two materials) to improve wear and provide an effective seal under various conditions. Therefore, it would have been obvious for one of ordinary skill in the art at the time the invention was made to make the dynamic seal a composite as taught by Chandler to improve the life and function of the seal.

### *Conclusion*

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
